This study aimed to determine the influence of ROE, NPM, and EPS on the stock prices of energy sector companies listed on the Indonesia Stock Exchange in 2018-2022. The method used in this study was a quantitative method using secondary data in the form of financial reports in 2018-2022. The population used in this study was 85 energy sector companies. From these 85 companies, 4 companies were selected as samples using a purposive sampling technique.

The results of this study indicated that, based on the partial (t) test, ROE significantly influenced the stock prices of energy sector companies. Meanwhile, NPM and EPS did not significantly influence the stock prices of energy sector companies. Based on the results of the simultaneous (F) test, ROE, NPM, and EPS significantly influenced the stock prices of energy sector companies. Based on the results of the Rsquared (R²) test, it is known that ROE, NPM, and EPS affected 69.7% of the stock prices of energy sector companies.
